Crescent Systems, Inc. Runs Demo with Albuquerque Police Department

Richardson, TX – October 21, 2024

Crescent Systems, Inc. (CSI) worked with the Albuquerque Police Department (APD) to demonstrate proposed communication improvements to the APD's Airbus H125 helicopter. The helicopter is equipped with several systems to enhance the aircraft's capabilities in patrol and high-risk operations but is experiencing issues with unreliable Public LTE connectivity and unintelligible video while in flight.

The demonstration took place during the 52nd Albuquerque International Balloon Fiesta® October 5-13 and showcased the improved connectivity and video quality accomplished by mounting a Silvus Mesh Radio and Engo 265 GateWay in the aircraft to augment the existing onboard Engo 260 GateWay.

The APD was enthusiastic about the demonstration and impressed with Crescent System's ability to support a quick-turn demonstration, with CSI's Ryan Tinay noting that "The demonstration could not have run more smoothly. We were all very pleased." And, to further demonstrate the success of the improved communication, the maiden flight of the demonstration system aided in the apprehension of a perpetrator seen stealing a vehicle and attempting to evade APD.

About Crescent Systems, Inc.

Crescent Systems, Inc. (CSI) is a privately held Woman-Owned Small Business (WOSB) with several operating locations throughout the continental United States. Founded in 1995 initially to address the Defense community's multi-level secure defense messaging needs, CSI is a technology integrator providing multi-level secure Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) solutions to Department of Defense, State, and Federal agency customers.

Our trusted solutions are implemented through robust secure voice, video and data multi-domain architectures and devices engineered to operate. As an established Systems Integrator supporting the Aerospace and Defense industry over the last two decades, CSI has a proven reputation for designing, developing, and certifying products and systems for integration into harsh and austere environments.

For further information, contact Ryan Tinay, Chief Innovation Officer.
