Crescent Systems, Inc. Announces Strategic Partnership with D&J Aviation, Inc.

Roseville, CA – March 1, 2017

Today, Crescent Systems, Inc. (CSI) announced the formation of a strategic partnership with an aviation engineering and integration organization with a focus on Special Aerial Mission solutions development and installation. Drawing from the decades-long experience in Systems Engineering, Product and Software Development, Internal/External Aircraft Modification and Integration and Airworthiness Certification, both Crescent Systems and D&J Aviation of Colorado Springs, CO entered this strategic partnership to capitalize on each of the company's augmenting core competencies.

D&J Aviation, Inc. (DJA) is a Service-Disabled Veteran-Owned Small Business (SDVOSB) Federal Aviation Administration (FAA) Part 145 Certified Repair Station (CRS # 4JDR353D) operating out of Colorado Springs, CO and is backed by over 40 years of aviation integration and installation experience for both commercial and Government aviation customers.

"Since its inception, Crescent Systems has proudly supported our US Military end-users and now has the desire and ability to extend this support to our Federal, State and Local Public Safety aviation operations partners," states Ryan Tinay, Chief Innovation Officer of CSI. "By establishing this partnership with DJA, we can confidently offer our customers a comprehensive products and services mission system solutions that begins with product and software development through airworthiness certification. These efforts all accomplished under a small business umbrella; an alternative to traditional "big business" acquisitions which can be lengthy and less affordable."

About Crescent Systems, Inc.

Crescent Systems, Inc. (CSI) is a privately held Woman Owned Small Business (WOSB) with several operating locations throughout the continental United States. Founded in 1995 initially to address the Defense community's multi-level secure defense messaging needs, CSI is a technology integrator providing multi-level secure technical solutions to National and Nuclear Command, Control and Communications customers.

Our trusted solutions are implemented through robust secure voice, video and data multi-domain architectures and devices engineered to operate. As an established Systems Integrator supporting the Aerospace and Defense industry over the last two decades, CSI has a proven reputation for designing, developing and certifying products and systems for integration into harsh and austere environments.
