Release: IMMEDIATE

Crescent Systems, Inc. Recertifies AS9100D Certificate of Registration

Richardson, TX – June 1, 2023

Today, Crescent Systems, Inc. (CSI) announced it has recertified its AS9100D Certificate of Registration. The certificate issuance is a result of an assessment performed on CSI's Quality and Management Systems last month. The systems were audited against the management system's applicability to the design, development, manufacturing, and installation of custom hardware to meet the specific needs of airborne and ground-based systems.

Renewing this certificate reflects CSI's ongoing commitment to the delivery of reliable airborne and ground-based mission system solutions. "The emphasis on Quality is one of our company's core values and is our focus throughout the product realization process," stated Robert Griggs Director, of Operations of Crescent Systems, Inc. "Having an independent evaluation of our Quality and Management systems and producing the records showing your workforce is following processes and released procedures is a critical feedback tool to our company's continuous improvement."

For a copy of the certificate, visit CSI's website at www.csitx.com.

About Crescent Systems, Inc.

Crescent Systems, Inc. (CSI) is a privately held Woman-Owned Small Business (WOSB) with several operating locations throughout the continental United States. Founded in 1995 initially to address the Defense community's multi-level secure defense messaging needs, CSI is a technology integrator providing multi-level secure Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) solutions to Department of Defense, State and Federal agency customers.

Our trusted solutions are implemented through robust secure voice, video and data multi-domain architectures and devices engineered to operate. As an established Systems Integrator supporting the Aerospace and Defense industry over the last two decades, CSI has a proven reputation for designing, developing, and certifying products and systems for integration into harsh and austere environments.
