Crescent Systems, Inc. Invited to Observe Joint All-Hazards Awareness & Assessment Exercise

Roseville, CA – May 29, 2023

Crescent Systems, Inc. (CSI) announced being invited to observe and support this year's annual Joint All-Hazards Awareness and Assessment Exercise (JAHAAX). As an aviation partner to Silvus Technologies, CSI was invited to participate in the event to aid in StreamCaster 4000-series radio configuration, deployment and integration with partner US Military, Federal and Civil agency participants. The exercise evaluated virtual command and control processes in support of all-hazard civil support.

Performance measurements collected from the exercise will help agency stakeholders establish possible process improvements and aid in pathway development of future technology insertions, emerging technology demonstration theories of operation and mature technology integration potential. These metrics are critical to Emergency Services agencies to evolve with the environment while adapting to technological advancements in industry.

The JAHAAX activity is an annual hands-on interagency integrated training with live flights ensuring preparation for all-hazard civil support. The multiagency training exercises tests and evaluates the California National Guard's Incident Awareness and Assessment (IAA) capabilities. The multi-day event rigorously tests the California Military Department's capacity to support civil authorities during state emergencies.

For more information about Silvus Technologies, contact Greg Dunbar, Director of Sales, Public Safety & Commercial at (310) 429-2676 or greg.dunbar@silvustechologies.com. You can also visit the Silvus website at www.silvustechologies.com.

About Crescent Systems, Inc.

Crescent Systems, Inc. (CSI) is a privately held Woman-Owned Small Business (WOSB) with several operating locations throughout the continental United States. Founded in 1995 initially to address the Defense community's multi-level secure defense messaging needs, CSI is a technology integrator providing multi-level secure Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance (C4ISR) solutions to Department of Defense and State and Federal agency customers.

Our trusted solutions are implemented through robust secure voice, video and data multi-domain architectures and devices engineered to operate. As an established Systems Integrator supporting the Aerospace and Defense industry over the last two decades, CSI has a proven reputation for designing, developing, and certifying products and systems for integration into harsh and austere environments.
