

IT Manager

About Us

Crescent Systems, Inc. (CSI) is a leading aerospace technology firm that designs, develops, implements, tests, deploys, and sustains reliable and rugged electrical, software, and hardware systems solutions for complex problems in the aerospace industry. Our integrated solutions teams focus on delivering high-performance products and services to meet our clients' needs. Our core values of ethics, quality, and community guide every conversation, decision, and interaction.

Job Description

We are seeking a highly skilled and experienced IT Manager to lead our IT department. The IT Manager will be responsible for managing the overall IT infrastructure, projects, and team members. The successful candidate will possess strong leadership abilities, technical expertise, and a passion for delivering high-quality IT services.

Essential Duties, Responsibilities, and Qualifications

- Oversee a team that manage network technology, IT security and the software platforms used by the company
- Establish data storage infrastructure and access protocols and rules within the company
- Develop and maintain IT policies, procedures, and documentation to ensure compliance and operational efficiency
- Conduct regular performance evaluations, provided coaching and training, and foster professional development opportunities for team members
- Collaborate with cross-functional teams to identify technology needs and provide innovative solutions
- Manage resources and processes required to design, plan, and support all information products and services
- Monitor system performance, identify areas for improvement, and implement corrective actions to enhance overall IT effectiveness
- Ensure compliance with regulatory requirements and industry standards
- Manage IT budgets, control costs, and provide accurate financial reporting

Preferred Qualifications

- Bachelor's degree in information technology, Computer Science, or a related field
- Experience With CMMC Compliance
- Experience With NIST RMF Accreditation Methods
- Maintain systems compliance with government security policies and procedures
- Current Secret or Top-Secret Security Clearance
- Experience leading and managing a team of IT professionals
- Strong technical knowledge and expertise in IT infrastructure, networks, and software applications
- Project management skills with the ability to prioritize tasks and meet deadlines
- Excellent problem-solving and decision-making abilities

- Strong communication and interpersonal skills to effectively collaborate with stakeholders at all levels
- Demonstrated ability to adapt to changing technologies and environments
- Experience in managing IT budgets and controlling costs
